The contractor or builder applying for new construction, or additions to existing buildings, shall notify the building official upon the marking or laying out of the site and foundation for such work. The official shall inspect the location of the proposed building to determine conformity with the city zoning regulations. In case of doubt respecting the required location, the building official may require an official survey of the lot lines to determine conformity, at the expense of the applicant. Whenever an application for a building permit is made, the building official may, if he or she finds it necessary to determine whether the building work described in the application will comply with the laws pertaining to such work, require that the applicant file a written description or drawing of the proposed building as may be prepared for the purpose. If such drawing or description is insufficient for the purposes of determining whether a permit should be issued, the building official may require the applicant to file complete architectural and engineering plans and specifications for such building or any part thereof, as may be necessary for the inspector to determine compliance with this article.
